E2-QZ endpoints: Hunyuan + Qwen, Chinese instructions

Step 99 of 100 for trajectories 0 to 35 (the first 36 of the 100 seeds, numbered by seed). Same seeds and loop as A0-core with the generator, captioner and language swapped: HunyuanDiT v1.2 + qwen2.5vl:7b, Hintze's caption instruction translated into Chinese.

Run e2_qz, 2026-10-22/23, 10,000 trajectory-steps on one RTX PRO 6000. Brad Hinkel, github.com/bradhinkel/ai_to_ai_loops (reports/e2_qz.md).
